

NEW TECNAM 4567 NOW OURS

NEWS

The Tecnam 4567 is now online for all club members to use.

Contact Graham on 0408 694998 now to get your spot. He is going like a tiger to get everyone in the air.

Date: FRIDAY 24TH MARCH 2006

After an anxious wait the Tecnam 4567 from Horsham has been purchased and delivered to the Mid Murray Flying Club. After the Committee sanctioned the purchase they set about covering all the associated paperwork to ensure that it can happen. Don't be mistaken! When you have finance companies involved on both sides and the additional technicalities of aircraft ownership, it has taken some real tenacity from our Treasurer and President to make it happen as soon as possible. This now gives us flexibility to have an ultralight available while the other is in for maintenance as is the case now. Additionally it will give members greater availability of ultralight flying.

The Club has taken on board feedback from members to get another ultralight online and in doing so, we encourage all members to book some hours over the next couple of months and make this decision a great one. Jack says its better than the other one.

Tecnam 4567 has several differences to Tecnam 4234.

- Larger tyres on the landing gear giving a higher likelihood of a greaser landing!
- Electric Trim on the stick along with the push to talk button.
- Fuel flow meter so you can see how economical you are in the air
- Transponder - for navigation exercises into major airports.

Jennie at Horsham Aviation doing her run-up before departing for Swan Hill. The trip home was very rough and Jennie was a little puffed. Well done Jennie.
